

DIFFERENT BY DESIGN®

The Volkswagen T6.1 Shuttle SE

By Lewis Reed

The choice is yours

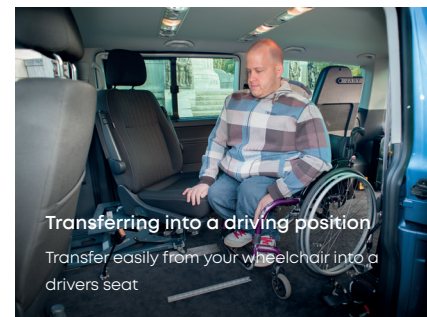

Choose from a passenger carrier, transfer to drive or drive from wheelchair vehicle.

Lewis Reed offer four different VW T6.1 Shuttles converted for your needs. Choose from either; a passenger carrier vehicle, a transfer to a driver's seat, transfer into an adapted six-way driver seat, or drive directly from your wheelchair. Whichever conversion you require, Lewis Reed can provide you with bespoke options to allow you to drive independently.

The redesigned and updated VW T6.1 Shuttle sets new standards in both safety and technology. With its numerous seating configurations, compact dimensions, an excellent eye line for most wheelchair users, and soon with the option of two roof heights, this make this vehicle a dream not only to be a passenger in, but to drive and park.

Internally, the vehicle has a stylish new dashboard which incorporates a composition colour DAB+ radio system with 6.5" touch-screen and six speakers.

Quieter, smoother and more versatile than any other VW Shuttle conversion available, Lewis Reed's specialist design team has built and finished these superb vehicles with only you in mind. Combining more functionality with extra comforts, whichever version you choose will far exceed your expectations.

Passenger carrier

This vehicle offers easy access to all. Whether it is rear or side entry you need, Lewis Reed has the perfect answer for you.

For side access we have our slim side lift that discreetly fits under the side of the car. Alternatively you may prefer our rear access tail lift or lowered floor, lowering suspension and innovative TorSpring® Ramp rear access. The twin side sliding doors allow easy access from both sides, and for total luxury and ease why not opt for the fully automatic entry system. Just press a button and enter. Automatic tailgate, lift and side doors. It couldn't be easier.

Transfer / to drive

Here at Lewis Reed our aim is for you to be as independent as possible.

Access is simple and easy by means of using a rear platform lift with auto rear doors (standard), or from a side access lift with auto remote side sliding door (optional). Both choices are operated remotely by using a single palm sized key fob.

Lewis Reed carefully prepare this vehicle to incorporate simple optional push/pull hand controls and to facilitate further customer adaptations which will enable the vehicle to be driven from the driver position. In addition we offer an optional electric drivers six-way seat which enables the wheelchair user to make an internal transfer onto the seat with ease.

Comprehensive safety

Torough safety tests are carried out on all seats and restraints

Safety

Arrive in style, not to mention safety and comfort.

Almost every part of the vehicle's design contributes to safety. Features such as Front Assist with City Emergency Braking, Crosswind Assist and brake assist are all standard on this vehicle. As you would expect there is Anti-lock Braking System (ABS), Electronic Brakeforce Distribution (EBD/EBV), Electronic Stabilisation Programme (ESP) and driver and passenger front airbags are fitted as standard, while side and curtain airbags can be specified as an option.

For extra security and protection, the Shuttle incorporates ISOFIX child seat mounting points as standard, while optional features such as anti-theft devices, parking sensors, reversing cameras, Bi-xenon headlights, Lane Change Assist and cornering lights all offer added peace-of-mind.

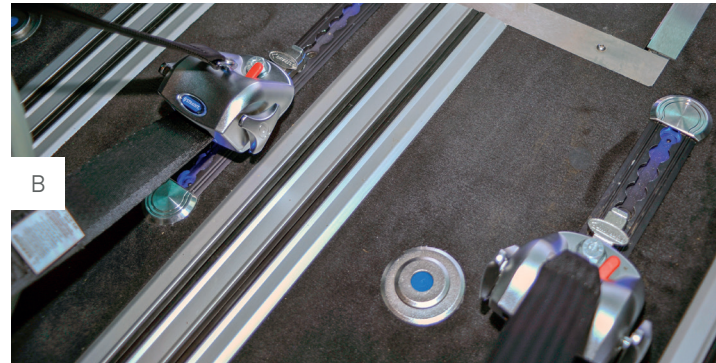

Sure-Fit 200®

Our comfortable wheelchair tie-down and occupant restraint system.

Many wheelchair passengers experience difficulty when trying to get their seat belts to fit comfortably. To combat this issue we have designed a system that will fit nearly every passenger regardless of their stature, wheelchair size and seating position. The Sure-Fit 200® features include a seat belt shoulder adjuster (A) and wheelchair securing belts (B) which can be moved easily to accommodate different wheelchairs. This ensures the passenger can travel safely and in comfort (C).

If you use more than one wheelchair, have a growing child or need to change your chair for a different model, the Sure-Fit 200® is flexible enough to cope with the differences without any compromise.

As you would expect from Lewis Reed, our system is discreetly installed to compliment the original vehicle. Integrated ambient lighting helps you to operate the system easily in the dark, and for peace of mind the Sure-Fit 200® has been successfully tested in-vehicle to secure heavy wheelchairs weighing up to 200kg.

New interior styling

Fantastic ergonomic layout, dynamic driving characteristics

Flexible seating

Available in SWB and LWB, the Shuttle offers a variety of seating configurations enabling you to tailor your vehicle to your own particular needs.

Choose from up to seven original VW passenger seat positions as standard and a choice of up to five wheelchair positions which includes the possibility of a front, middle or rear wheelchair position. With the flexibility to remove seats from the vehicle, this will provide additional every day extra space for you and your family. See page 11 for seating layout.

Comfort and space

The Shuttle delivers the perfect combination of comfort, durability and space.

Travelling as a passenger or a driver in the new VW Shuttle is a truly pleasing experience. It provides style and comfort combined with abundant space. Without doubt, the Shuttle's new interior styling, fantastic ergonomic layout, dynamic driving characteristics and extensive specification make it a top performer in its own right. From the moment you enter, you'll find a light and airy interior constructed from high-quality materials.

New impressive standard features include plush floor carpet, upgraded upholstery, vented roof trim with reading lights and climatic air conditioning. A range of useful options are also available that reflect its virtue as a great vehicle.

For entertainment the Shuttle is fitted with a new digital cockpit comprising of a new composition colour DAB+ radio system with 6.5" touch-screen, AUX-IN socket and Bluetooth telephone connectivity, while for convenience, electric front windows, electrically heated and adjustable door mirrors and remote central locking play their part.
