TOYOTA PROACE VERSO

A photograph showing a man in a wheelchair being assisted into the back of a silver van. The van's rear hatch is open, and a ramp is extended. A second man is standing behind the wheelchair, holding the backrest. The wheelchair has a blue logo on the backrest and yellow-tinted wheels. The van's interior shows black seats and a mesh floor. The background is a bright, outdoor setting with greenery.

58" / 1475mm ENTRY HEIGHT

## GREAT DAYS OUT START HERE

The **Brotherwood® TIGON** Toyota Proace Verso conversion provides the space and versatility a family needs. With a tall, wide, and inclusive central wheelchair location between two rear carer passenger seats, the Brotherwood® TIGON can safely transport the heaviest of powered wheelchairs. The huge payload capacity of the TIGON is complimented by the STORQ rear restraint system, which has been robustly engineered to restrain **large wheelchairs up to 200kg**.

The central wheelchair location also ensures a smooth, quiet, comfortable ride for the wheelchair user, integrating harmoniously with the family. For an extra touch of refinement, optional VB-AirSuspension ensures unbeatable ride quality and even easier loading with remote-controlled height adjustment, and auto-levelling for a consistent ride at any payload weight.

Designed &

# HEADROOM & VISIBILITY

56.5" / 1435mm INTERNAL HEADROOM

## FLAT, LEVEL LOWERED FLOOR

The low, level floor of the Brotherhood® TIGON conversion offers a stable, comfortable, natural seating position, for better visibility, social inclusion and ride quality. The TIGON offers 56 ½ inches of internal headroom with great view out of the windscreen and windows – even taller travellers will share a similar eye-level to the driver and passengers, for a better view out through the windscreen and front windows.

Reducing the centre of gravity for the wheelchair user also reduces the sensation of 'body-roll' when cornering, whilst travelling on a completely level surface promotes optimal posture for the wheelchair occupant.

### CASTER BLISTERS

Wider space for wheelchair caster wheels to rotate

# CONVENIENCE & COMFORT

9° RAMP ANGLE WITH AIR SUSPENSION

9°

## OPTIONAL AIR SUSPENSION

Exclusive to Brotherhood®, the optional VB-FullAir air suspension system replaces the traditional rear spring setup with a full air suspension system that filters out unevenness in the road surface, increasing ride comfort. The driveability and stability of the vehicle are improved, which in turn increases safety. VB-FullAir features a sophisticated remote control that can be used to easily operate all functions of the suspension.

The VB-FullAir system is also self-levelling, ensuring a consistent ride height and floor level at any load weight or number of passengers. The suspension can also be lowered when loading and unloading, reducing the approach angle of the access ramp to just 9° for faster, easier wheelchair access.

### EASIER LOADING

9° ramp approach angle when lowered

# SAFETY & PEACE OF MIND

200KG WHEELCHAIR RESTRAINT SYSTEM

## HEAVY DUTY RESTRAINT SYSTEM

The Brotherwood® TIGON can safely transport the heaviest of powered wheelchairs, and is robustly engineered to restrain large wheelchairs up to 200kg\* with ease. The huge payload capacity is further enhanced by the STORQ rear restraint system, which automatically tension the rear restraints, for even faster securement of the wheelchair.

In addition, the Hook-i PAWRS powered front restraint system takes all of the effort out of loading wheelchair and passenger. Eliminating the need for manual pushing, you simply attach the restraints and use the PAWRS remote control for effortless power-assisted loading of wheelchair and passenger.

\*Rear restraints may require double-strap configuration for 200kg capacity

Pre-Collision System with pedestrian detection
5-star Euro NCAP safety rating

Whilst we make every effort to ensure specifications are correct, manufacturer specifications are subject to change without notice.

### TOYOTA SAFETY SENSE

The wide range of innovative Toyota Safety Sense systems include:

- Adaptive Cruise Control
- Head Up Display
- Colour TFT multi-information display
- Pre-Collision System with pedestrian detection
- Dashboard storage

Combining all these features with a 5-star Euro NCAP safety rating makes the Proace Verso a safe place to spend a day out.

PROACE  
VERSO

### ADVANCED ENGINEERING

With a complete line-up of advanced diesel engines and smooth transmissions, the Proace Verso gives you power and fuel efficiency to match its load-carrying ability. With two responsive diesel engines to choose from; three power outputs; and two transmissions, there's a powertrain available to meet your needs.

# FREE HOME DEMONSTRATIONS

The highest quality product deserves the highest quality service. We are committed to delivering personal, expert, friendly service, to every client - without pressure or obligation.

As part of our commitment to providing the perfect product for your needs, we will perform a free home demonstration and provide your personal needs assessment, without charge, at a time and place that suits you.

We gather feedback from our clients to ensure our service is the best it can be - and you can see all of our feedback on our website.
