

MinimoPlus

All the features and functionality of the Minimo, plus a little more...

The same compact size and simple folding design as the award-winning Minimo, plus features normally only found on much larger scooters making Minimo Plus the perfect everyday companion for everyone who values their independence.

Pneumatic tyres provide a smoother, more comfortable ride and offer greater range and ground clearance. The lightweight lithium battery pack can still be lifted with one finger while a more powerful control unit with updated electronics improves ability over more challenging terrain.

Integrated high visibility front and rear LED lights seemingly round off an impressive list of extra features but the Minimo Plus goes further. Clever use of incredibly strong but lightweight carbon fibre means the overall weight is kept to a minimum. A simple quick release seat reduces weight even further meaning all of these extra features can be had without making Minimo Plus any more difficult to lift and transport.

- All the functionality of Minimo, plus more
- Pneumatic tyres for enhanced comfort, range & clearance
- Lightweight lithium battery weighing just 6.5lbs (3kg)
- Carbon fibre and aluminium frame for lightweight strength
- Travel at up to 4mph for a range of up to 12 miles (19km)
- User weight of up to 18 stone (115kg)
- Safety sensor to control cornering speeds

"I am loving my new Minimo Plus – it is a life changer. I cannot believe how easy it is to take on flights and get into my hotel. Brilliantly designed and easy to fold and unfold in seconds. There is now no mountain too tall or challenge too great."

Ron Mitchell

MinimoPlus
