

# CITROEN BERLINGO

Wheelchair Accessible Vehicle

# BLAZE

Flair XTR model shown

# GOOD THINKING INSIDE GOOD LOOKING OUTSIDE

Enjoy the space and comfort of the latest generation Citroen Berlingo. The Blaze looks after everyone - the driver has a fully equipped and comfortable cabin, the passengers are equally looked after and most importantly the wheelchair passenger. A low angle ramp, a roomy interior and a great eye line mean wheelchair occupants will always be comfortable in the Citroen Berlingo Blaze.

# WHEELCHAIR ACCESSIBLE FEATURES

- 1** Lightweight easy-to-use bi-fold assisted ramp
- 2** Lowered floor for optimum headroom
- 3** Optional second rear seat
- 4** Optional winch available
- 5** Low gradient ramp for minimal effort
- 6** High quality four point restraints
- 7** Adjustable lap and diagonal seatbelt
- 8** Safety tested to EC Whole Vehicle Type Approval
- 9** Fully compatible with UK Wheelchair Accessible Vehicle standard - PAS 2012

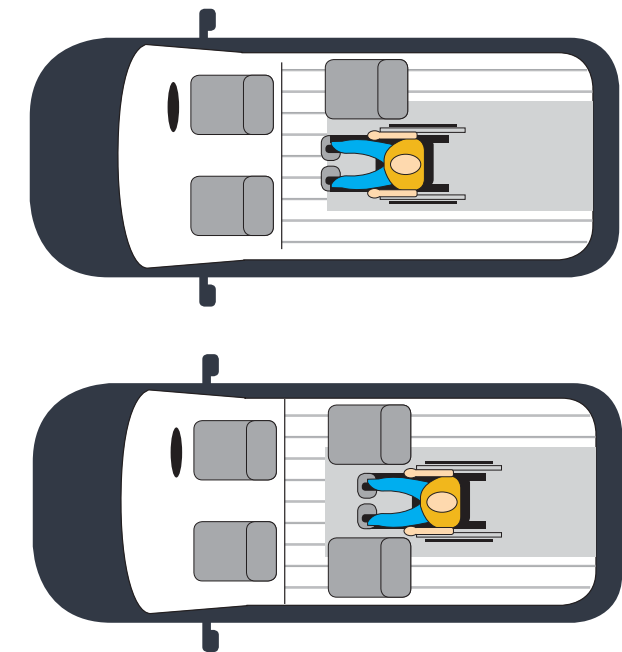

# A GREAT VIEW AWAITS

## SEATING LAYOUTS

In its standard layout the Blaze comes with 3 seats as standard and room for the wheelchair passenger. An optional rear seat gives you the ability to carry four.

# STAY CONNECTED

The bright and clear 8" touch screen allows you to zoom with your fingertips, just like a smartphone, so it fits right into daily life. From here you can control a range of the car's features including driving assistance technologies and audio functions. With the ingenious Mirror Screen technology you can also connect your smartphone and safely enjoy all kinds of driving-compatible apps using the touch screen. It works with Apple CarPlay™, MirrorLink® and Android Auto.

ANALOGUE AND DIGITAL SPEEDO DISPLAY

STEERING WHEEL CONTROLS

AIR CONDITIONING AS STANDARD

REAR CUPHOLDER AND 12V SOCKET

# SAFETY COVERED

## ACTIVE LANE DEPARTURE WARNING SYSTEM

Using a camera that senses when you’ve unintentionally crossed solid and broken road markings, Active Lane Departure Warning gently steers you back on course. The system stops working as soon as the indicators are used.

## COLLISION RISK ALERT

If there’s a risk of collision with the vehicle in front of you, Collision Risk Alert sends an immediate warning. The technology uses a sensor mounted on the front of your car and works from just over 18mph.

## ACTIVE SAFETY BRAKE

Designed to reduce the risk of a collision, this system works from 3mph and detects fixed or mobile objects and pedestrians. If a collision risk is spotted, there’s an audible alert, and if the driver doesn’t respond, then the vehicle brakes are automatically applied.

## HILL START ASSIST

An aid to safe, smooth driving, this feature prevents the car from rolling back on a hill when the brake pedal is released. The system works on gradients over 3% and keeps you stationary for about 2 seconds – plenty of time to move calmly from brake pedal to accelerator.
