Shuttle CENTRO

The Volkswagen Shuttle Centro, combines a fresh, sleek exterior design with a spacious interior.

This very popular vehicle offers a high level of luxury along with the latest in fuel efficiency and environmentally friendly performance. Most importantly the Shuttle Centro brings you unparalleled practicality for the wheelchair user.

Available in both manual or automatic transmission, and in S or SE specifications the Shuttle will leave you spoilt for choice. The Shuttle Centro conversion is fitted with a lowered floor giving the wheelchair user ample headroom.

The Shuttle Centro offers the ultimate in safe, secure and user-friendly wheelchair travel.

This rear wheelchair passenger solution vehicle is fitted with a low angle lightweight ramp. Both wheelchair and mobility scooter users will feel at ease entering and exiting the vehicle using the ramp, which has a maximum load weight of 300kg and an easily manageable incline of approx. 10.8°.

Before entering the vehicle, the wheelchair is fastened to the electric front restraints, preventing the wheelchair from rolling backwards. Once in the vehicle the wheelchair can be secured in place by high-quality rear floor restraints, while lap and diagonal seat belts ensure optimum safety for the wheelchair passenger. We also fully test all our conversions and are certified to meet the highest automotive and accessibility standards.

Standard Equipment of the Shuttle S
